I. DESCRIBE YOUR PLANS FOR IMPLEMENTING THIS ACTION.

Data access is a requirement for modern web presence development.

- Access to institutional data
- Data storage options readiness
- Data access requests

With the help of the web management community, identify needs and define a process for meeting those needs.

- Identify data requirements for web.
- Develop process model to address needs (find who owns and maintains data; obtain data manager approval; get data in correct format, storage, and delivery mechanism).

II. WHAT ARE THE POLICY AND PRACTICE IMPLICATIONS OF YOUR PLANS?

Institutional data access, and collecting/storage/retrieval of data, should always be done in a secure fashion and at an institutionally acceptable level of risk.

- Define policies for usage of institutional data in web environments.
- Establish best practices and ensure these are up to date and communicated to all constituents.
