I. DESCRIBE YOUR PLANS FOR IMPLEMENTING THIS ACTION.

Data access is a requirement for modern web presence development.

• Access to institutional data
• Data storage options readiness
• Data access requests

With the help of the web management community, identify needs and define a process for meeting those needs.

• Identify data requirements for web.
• Develop process model to address needs (find who owns and maintains data; obtain data manager approval; get data in correct format, storage, and delivery mechanism).

II. WHAT ARE THE POLICY AND PRACTICE IMPLICATIONS OF YOUR PLANS?

Institutional data access, and collecting/storage/retrieval of data, should always be done in a secure fashion and at an institutionally acceptable level of risk.

• Define policies for usage of institutional data in web environments.
• Establish best practices and ensure these are up to date and communicated to all constituents.

III. IDENTIFY STAKEHOLDERS.

• UITS webmasters
• IU webmasters
• Campus webmasters
• Libraries
